SIMULATIONS

G25 SLI

SHIFT LIGHT INDICATOR

CXC Simulations, producer of full motion simulators for professional racing teams and drivers, now brings F1-level technology to the world of racing gaming.

Designed as an in-wheel display for the Logitech G25 steering wheel, the G25 ShiftLightIndicator adds a Formula 1 style LED RPM and Gear Indicator array mounted inside the wheel to be an integral part and turn with it like those on professional race cars. Made of 3K high-gloss carbon fiber twill, the G25 SLI weighs just 100 grams to insure virtually no force feedback performance loss. Compatible with all top computer racing simulation software.

The unit is "plug and play," easy to install and comes with a six-foot USB extension cable, installation manual and tool.

What's in the Box:

- G25 SLI
- 6ft USB Extension
- Graphical Quick-Start Guide
- 4mm Hex Wrench
- Zip Ties and Anchors
- Driver CD
